Conrad San Juan Condado Plaza

The real-time city is now real! The increasing deployment of sensors and hand-held electronics in recent years is allowing a new approach to create an interface between people, technology and the urban environment.

Join leading thinkers from around the world to discuss how Real Time Digital Data Planning and other innovative technologies can be used to break traditional barriers, allowing cities to serve the needs of their citizens in a more effective manner, while reducing costs and creating new business opportunities for suppliers and service providers.

### Main Topics:

- Global Landscape, The Future of Cities
- Real Time Digital Data as Enabler of Sustainability, Quality of Life and Competitiveness
- Using Real Time Data Planning & ICT to Unleash the Economy of Agglomeration Forces Underlying the Urban Setting
- P4 Public Private Partnerships for People: Financing the Smart City
