

Addressing Supply Chain Disruptions and Digital Transformation During the Pandemic

The pandemic has amplified the importance of supply chains and digital transformation to the global economy. U.S. Chamber CEO Tom Donohue discussed these issues on the B20 blog.

Supply chains: One issue for the B20, representing the business community across G20 countries, has been supply chain disruptions due to the pandemic. “This is not the time to erect new barriers to commerce,” said Donohue. “Countries across the world are responding to the surge in demand for medical equipment and other related goods and services, and we all rely on the global networks that connect us.”

Digital technology: The pandemic forced many companies to move to remote work almost immediately, Donohue noted. “We are ready to work with our partners to make sure that the online space remains flexible, open, safe and secure. Digital empowerment and inclusion should be a priority of lawmakers across the world.”
