

We're Supporting the #MaskingForAFriend Challenge

The Chamber's International Affairs Division and the Chamber Foundation's Center for Education and Workforce are participating in World Mask Week (August 7-14), to promote the use of face masks as one of the best tools to fight the pandemic.

Our take: We know that community masking is critical to stopping the spread of COVID-19 and laying the groundwork for a safe reopening of businesses, schools and communities – both in the United States and around the globe. The Chamber has [called for clear guidance](#) on mask mandates and created a [tracker](#) with state-by-state mask regulations.

This week, we're supporting the #MaskingForAFriend challenge and encouraging Chamber staff to #MaskUp and post photos on social media.

Join in: Post a masked photo and tag the [Pandemic Action Network](#), as well as [@USChamber](#).
