

Workforce Action Report: DeVry University Awarding \$10 Million to Support Women in Tech

Today's spotlight: DeVry University's Women+Tech Scholars Program

Innovation in action: The U.S. Chamber of Commerce Foundation mobilizes the business community to find innovative solutions that solve workforce challenges. DeVry University's [Women+Tech Scholars Program](#) awards up to \$10 million in scholarships for women in tech who apply and qualify for the program. DeVry is awarding up to \$1,500 per semester in scholarship awards for qualifying students in an engineering and information sciences certificate, associate, or bachelor's program.

Don't miss: The first session of the U.S. Chamber Foundation's [Talent Forward virtual event series](#) on May 18 will discuss how to create more equitable pathways into the workforce for underrepresented groups — particularly women and people of color. Speakers include DeVry University President and CEO Tom Monahan, who will underscore the value women bring to the digital industry and the workforce of the future.

Get connected: To partner with us and learn how the Chamber Foundation's workforce initiatives can help your organization close the skills gap, email workforce@uschamber.com.
