

Workforce Action Report: Udacity Training 100,000 Students for Careers of the Future

Innovation in action: The U.S. Chamber Foundation’s workforce initiatives develop solutions that ensure Americans have the right skills for the right jobs. Udacity is an example of innovative skill development by democratizing education and allowing students the opportunity to master in-demand skills.

Udacity is an online learning platform dedicated to training the workforce of the future by offering nanodegrees in more than 90 program areas like data science, machine learning, artificial intelligence, cloud computing, and autonomous systems. With students enrolled in more than 190 countries, Udacity has had more than 100,000 graduates. [Learn more about Udacity.](#)

Don’t miss: The Foundation’s second session of its [Talent Forward virtual series](#) on June 15, to discuss the urgency of rethinking how we reskill and upskill talent and talk to employers, including Udacity, that are already creating programs to build a workforce fit for today—and tomorrow.
